

Common Group Policies

Here are 10 common group policies that you can configure in Active Directory, along with brief descriptions and instructions on how to configure them:

1. Password Policy - Specifies password complexity, length, and history requirements.
 - To configure: Open the Group Policy Management Console (GPMC) and create a new Group Policy Object (GPO). Navigate to "Computer Configuration" > "Windows Settings" > "Security Settings" > "Account Policies" > "Password Policy".
2. Account Lockout Policy - Specifies the number of failed login attempts before an account is locked out.
 - To configure: Create a new GPO and navigate to "Computer Configuration" > "Windows Settings" > "Security Settings" > "Account Policies" > "Account Lockout Policy".
3. Software Restriction Policies - Specifies which applications are allowed to run on computers in the domain.
 - To configure: Create a new GPO and navigate to "Computer Configuration" > "Windows Settings" > "Security Settings" > "Software Restriction Policies".
4. Windows Firewall - Specifies firewall settings and rules.
 - To configure: Create a new GPO and navigate to "Computer Configuration" > "Policies" > "Windows Settings" > "Security Settings" > "Windows Firewall with Advanced Security".
5. Internet Explorer Maintenance - Specifies settings for Internet Explorer, including favorites and security zones.
 - To configure: Create a new GPO and navigate to "User Configuration" > "Policies" > "Windows Settings" > "Internet Explorer Maintenance".
6. Folder Redirection - Redirects user folders, such as Documents or Desktop, to a network location.
 - To configure: Create a new GPO and navigate to "User Configuration" > "Policies" > "Windows Settings" > "Folder Redirection".
7. Logon Scripts - Runs a script when a user logs on to a computer.
 - To configure: Create a new GPO and navigate to "User Configuration" > "Policies" > "Windows Settings" > "Scripts" > "Logon".

8. Startup Scripts - Runs a script when a computer starts up.
 - To configure: Create a new GPO and navigate to "Computer Configuration" > "Policies" > "Windows Settings" > "Scripts" > "Startup".
9. Drive Mapping - Maps network drives to drive letters on users' computers.
 - To configure: Create a new GPO and navigate to "User Configuration" > "Preferences" > "Windows Settings" > "Drive Maps".
10. Remote Desktop - Specifies settings for remote desktop connections.
 - To configure: Create a new GPO and navigate to "Computer Configuration" > "Policies" > "Administrative Templates" > "Windows Components" > "Remote Desktop Services".
